PROFESSIONAL EXPERIENCE

Alliance Software, Inc.

DTS Trainee – Technical Support Services | May 5, 2025 – October 5, 2026

Cebu City, Philippines

- Provided technical support and troubleshooting for POS and related backend systems.
- Remotely accessed terminals using AnyDesk to investigate POS issues and perform technical checks.
- Investigated transaction discrepancies, missing sales, transaction-number sequencing, Z-readings, E-Journals, and Sales Book records.
- Used SQL/SQLite queries and local database records to verify sales, transaction, and posting information.
- Performed POS configuration checks and reset-config procedures following client approval and support procedures.
- Investigated system and network-related issues using Windows Event Viewer, terminal activity, and available system logs.
- Prepared technical activity, root-cause, verification, and development-check reports for investigated incidents.
- Communicated with clients and cashiers to gather issue details, explain findings, obtain approval for data fixes or resequencing, and confirm system status.
- Coordinated issues requiring development/data-fix checking and verified results after changes.

PROJECTS

Portfolio-Labares — Personal Portfolio Website — Personal portfolio website showcasing web development, technical-support experience, education, training, and projects. Built with front-end web technologies including HTML, CSS, and JavaScript.

<https://zedlabares.github.io/Portfolio-Labares/>

OrtigasChecker-v1.3 — Web-based POS tenant-file validation project using HTML, CSS, and JavaScript; includes file validation and calculation checking workflows.

Simple Website Calendar — Interactive calendar project built with vanilla HTML, CSS, and JavaScript.

Short Video Animation — School animation project covering the workflow from storyboard through final render.
